LOT 77 - Pair of Plain Metal Band Rings - Silver-Toned, Smooth Finish

Description

This offering includes two simple band rings. The metal composition appears to be a silver-toned alloy, potentially sterling silver or similar, with one ring exhibiting a slightly warmer, light gold-toned hue in certain lighting conditions, possibly indicating a different metal or plating. Specific hallmarks for metal purity are indistinct within the images. Both rings are in used condition, presenting a smooth, polished finish. Notable condition details include minor surface wear and light scratches, consistent with their previous use. They retain their reflective qualities with no significant toning or loss of luster. These items have not been slabbed or graded by a third party., Condition: As-Is

Quantity: 1
